STATEMENT REGARDING STATUS OF CLAIMS AND SUPPORT  
FOR CLAIM CHANGES PURSUANT TO 37 CFR §1.173(c)

Assistant Commissioner for Patents  
Box Reissue  
Washington, D.C. 20231

S I R:

Pursuant to 37 C.F.R. § 1.173(c), the reissue applicant in the above-referenced patent respectfully submits the following statement regarding the status of all claims of the patent and the support in the original disclosure for amendments made to the claims:

STATUS OF THE CLAIMS:

As of the date of this statement, Claims 1-26 are pending in the reissue application. No claim has been cancelled. Original claims 1, 3-13 and 15-24 have been amended and new claims 25 and 26 have been added by the preliminary amendment filed concurrently herewith. Original claims 2 and 14 are unchanged.

SUPPORT IN THE ORIGINAL DISCLOSURE:

Claims 1, 3, 12, 13, 15 and 24 have been amended to change "information" to "material." The purpose of these amendments is to better distinguish between the "material" that is displayed on the display devices and the "information" that is provided by the information mediators. The display content is interchangeably referred to as both "material" and "information" in the specification. For instance, lines 63-64 in column 8 state that the "projectors 22 project the information *material* onto the screen" (emphasis

added). Line 6 of column 8 mentions "picture material or exposure material." Thus, the specification provides support for this change.

Claims 1 and 13 have been amended to delete the language "such that said content, said location, said timing, and said duration are capable of being independently selected". The omission of this limitation from claims 1 and 13 is fully supported by the original disclosure. Applicant has added no new language to the claims and therefore has not added anything that was not is not supported by the disclosure.

Each of dependent claims 3-6, 8, 10-12, 15-18, 20 and 22-24 have been amended to change the claim dependency. These amendments in no way change the subject matter of the claims; consequently each of these claims is still supported by the specification

The remainder of the claim changes deal with correcting inadvertent mistakes and informalities in the original patent. These changes correct mistakes that are typographical, grammatical and/or clerical in nature and do not involve any new matter. Accordingly, these changes are supported by the specification.

Respectfully submitted,

Date: 3/2/01
